

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A polymer composition comprising a syndiotactic polypropylene and a thermoplastic elastomer including styrene and isoprene units and at least one of vinylisoprene or butadiene units.
2. (Previously Presented) A polymer composition according to claim 1, wherein isoprene and/or vinylisoprene units are at least partially hydrogenated.
3. (Previously Presented) A multilayer structure comprising at least one layer which comprises a polymer composition according to claim 1.
4. (Previously Presented) A multilayer structure which comprises a multilayer film or tube, which, in turn, comprises a layer which comprises the polymer composition according to claim 1 as a sealing layer.
5. (Previously Presented) A film or tube according to claim 4, wherein the sealing layer comprises additionally ethylene vinyl acetate and/or ethylene methyl acrylate.
6. (Previously Presented) A film or tube according to claim 4, comprising at least one barrier layer comprising an ethylene vinyl alcohol copolymer, a polyamide, a polyester, a liquid crystal polymer or mixtures thereof, or a cyclic olefin polymer.
7. (Previously Presented) A film or tube according to claim 4, comprising an outer layer comprising a thermoplastic polyester elastomer and/or a polyester block polyamide.

8. (Previously Presented) A film or tube according to claim 4, which comprises more than 40 % by weight of metallocene technology polyolefin resins from which at least 30 % by weight are polypropylene resins.
9. (Previously Presented) A bag made by welding a film according to claim 3.
10. (Previously Presented) An injection moulded article comprising a polymer composition according to claim 1.
11. (Previously Presented) A multilayer structure comprising at least one layer which comprises a polymer composition according to claim 2.
12. (Previously Presented) A multilayer structure which comprises a multilayer film or tube and in which comprises a layer which comprises the polymer composition according to claim 2 as a sealing layer.
13. (Previously Presented) A bag made by welding a film according to claim 12.
14. (Previously Presented) An injection moulded article comprising a polymer composition according to claim 2.
15. (Currently Amended) The multilayer structure of claim 3 comprising a haze, measured as total luminous transmittance according to ASTM D1003, of 5% to 25% after steam sterilization of between about 4% and 19%.
16. (New) A medical product comprising a bag according to claim 12.
17. (New) A medical product according to claim 16, wherein the bag comprises a dialysis bag, an infusion bag, a medical nutrient bag, or a medical solution bag.

18. (New) A medical product comprising a tube which comprises the composition of claim 1.
19. (New) A medical apparatus comprising an injection molded article according to claim 14.
20. (New) A medical apparatus according to claim 19, wherein the medical apparatus comprises a perfusion or dialysis apparatus.
21. (New) A polymer composition comprising a syndiotactic polypropylene and a thermoplastic elastomer selected from the group consisting of styrene-vinylisoprene-styrene resins and styrene-isoprene-butadiene-styrene resins.
